

Attached, please find the revised signature page for PCPs for Children and Adolescents who are actively involved in the justice system. This is mandated for use effective, August 1, 2008 per Implementation Update #45.

PCP Signature Page Revision

Reference: 3rd box of the PCP Signature Page.

Many of our children/youth receiving enhanced services are involved in multiple child-serving systems and require a unique level of care coordination. Individuals who are receiving or in need of an enhanced service and who are court involved, likely have a greater intensity of need and require increased collaboration for continuity of care.

For the purpose of the revised PCP signature sheet, “actively involved” with the:

- 1.) Department of Juvenile Justice and Delinquency Prevention (DJJDP) **means adjudicated youth.**
- 2.) adult criminal court system, means **individuals under probation supervision with the Division of Community Corrections, Department of Correction.**

In order to ensure the above defined individuals receive appropriate services, service requests must include an attestation that the provider has convened or scheduled the Child and Family Team (CFT) meeting or assigned TASC Care Management as deemed appropriate. Additionally, the provider must confer with the clinical staff at the LME for care coordination.

It is important to note that for *all* children and youth requesting or receiving enhanced services, the CFT process is the vehicle for Person-Centered Planning. This family-driven interagency process is crucial to children/youth and his/her family receiving the most appropriate and most effective services. All children/youth receiving enhanced services must have a Child and Family Team that meets regularly to plan for effective services and supports. See page 4 of the PCP Instruction Manual at:
